

# Fast T-Jet3™ Product Update

## *Protect your T-Jet-3 from unwanted head strikes*

As a part of U.S. Screens continued effort to offer the best backed Inkjet-to-Garment printer in the industry, we have discovered that by placing a magnet strip on one side of the Height Adjustment Bar and attaching the bar under the chrome T-Jet logo on the front of the printer as shown below, will greatly reduce the possibility of unwanted head strikes.

**Important Note:** You will still need to check for proper height clearance due to the possibility of uneven material across the shirtboard. *U.S. Screen is not responsible for any damage caused to the print head from head strikes.*

The Height Adjustment Bar will not only help protect the print head against head strikes, but creates an obvious reference to the distance between the print head and garment.

***Height Adjustment Bar must not be attached to the printer during the start up process. Please remove the bar before powering on your printer. After startup sequence is complete you may reattach the bar as shown above.***

We will be happy to mail the magnetic strips to any T-Jet3 owner if requested, or you can purchase the magnetic strips from most all general hardware stores.

Once you receive the magnetic strips, just peel the tape from the adhesive backing and apply to your Height Adjustment Bar.
